

MITIANS BUSINESS UPDATES (Monthly E Magazine)

Unleash the Power of Women Workforce in Corporates...

“ Women– The pillars of Success & Happiness in Family & in Enterprises”

Editorial

The third issue of the E Magazine comes with special messages highlighting on the Power of Women Force and congratulating the successful women entrepreneurs of MIT. Women's day is being celebrated in all the sectors of work atmosphere and its gaining momentum every year. No one can deny that Women are the Pillars of Success in Family and in Enterprises.

The issue contains the highlights of regular activities of MITEA, webinar 7 & 8 by successful Entrepreneurs of MIT around the globe, Inspiring messages from one of the Legendary Entrepreneurs of MIT and a successful alumnus settled in Holland, News makers of MIT, distinguished alumni awardees from the dept of Instrumentation of MIT, an article by an young alumnus doing his MS in Sweden and opportunities for budding Entrepreneurs.

In this issue, contains the notification for placing the advertisement by all the MIT alumni who are Entrepreneurs and all those who are serving in reputed companies world over to promote their products and services. The service comes into effect from the Tamil New year 14th April 2021 issue, which is 4th Issue of the E Magazine.

The coming days are very important for everyone of us in TN as we need to cast our vote to elect an efficient leader to head the state for the next five years. Think twice before deciding on whom to vote and enjoy the process of voting.

Wishing you all bright days ahead.

Yendrum Anbudan

DURAISAMY KANNAN
B.Sc., DM.I.T (Inst.) Graduated in the year 1967 TNo: 1678

Mobile: +91 8939678559

E-Mail: soakannan@gmail.com

After gaining experience by working in various industries in both India and Abroad in various disciplines like maintenance of process control instruments, project experience, detailed engineering in various industries like chemical, nuclear, pulp & paper, started a business in the name “SOA INST TECHNIKS” some 20 odd years back and carried out jobs both in India and Abroad for various clients successfully. It is not out of place to mention that few of the clients have doubled the capacities of their production units. Scores of technicians been trained and helped them to secure firm footing in various multi-national companies.

With the help of Mr. R. Balaji, of “IA FLOW ELEMENTS PVT. LTD.” developed an online density transmitter for liquid applications, manufactured and successfully supplied to various clients but could not make an impact in the industries due to various reasons.

Presently assisting a group called “SNIPE ENGINEERS PVT. LTD.” as their Chairman in the business of electrical and instrumentation system employing more than 400 persons both in India and Abroad to open their wings in countries like India, Middle East, South Africa. Also trying to start a training academy for the benefit of fresh graduates in engineering in various disciplines of electrical and instrumentation.

To help the under privileged have a trust in the name of “SNIPE EDUCATIONAL TRUST” which receives contributions from Employees and outsiders to support the needy in their education.

Successful Alumnus Settled in Holland

Message from Mr. Sundararaman, T No : 19th Batch Alumnus of MIT
Dear Dr. Elamvazhudhi,

I am flattered by your request that I could share my memories in the e-magazine.

When I see a lot of successful entrepreneurs amongst the alumni's , my memories does not add up to their unsung contributions. I was the project manager for a prestigious defense project for DRDL at Hyderabad involving putting up a liquid rocket engine test stand having highly advanced instrumentation and control involving ultra high speed UV recorders running at a chart speed of 10 meters per second. This project (code name Valiant was even mentioned by Dr. Abdul Kalam in his book " The Wings of Fire " although my name was not mentioned). Once it was handed over, I had to settle down to a very common and garden instrument engineering assignment again at EIL.

The positive side was that the company from Holland who supplied an ultra-pure Nitrogen plant asked me if I could join them in Holland which I accepted in 1976. My work in Holland involved a lot of international assignments worldwide in countries such as Yugoslavia, Egypt, Spain, France, Germany, Malaysia, Poland, Hungary, India, UK, Italy etc etc. Thanks to my wife (she took care of the family whilst I was away for long period assignments) , I was able to make a career in that company where I finally ended as a Sales/ Proposal manager and in total had worked for 38 years in the outfit.

I envy a lot of alumni entrepreneurs because I concentrated more on my work than starting anything of my own. Thus may be due to comfortable living in a liberal country like Holland and had no challenges. The entrepreneurial spirit will come only when one has challenges supported by some financial support. I had nine of these.

After my retirement in 2015, I decided to spend more time in golfing and tennis to keep physically fit as the company pension coupled with the generous Dutch state pension made me even more comfortable which prevented me from taking up any new challenges.

This story is not suited for upcoming youngsters as they might be tempted to seek comfort zones unlike the numerous entrepreneurs of MIT alumni's. I have a contented happy life (less after materialistic aspect) and enjoy additionally Indian classical music .

My story is a very common variety which will not inspire for persons with ambitions. This is a personal note to you as to why I don't want to publish any memoirs.

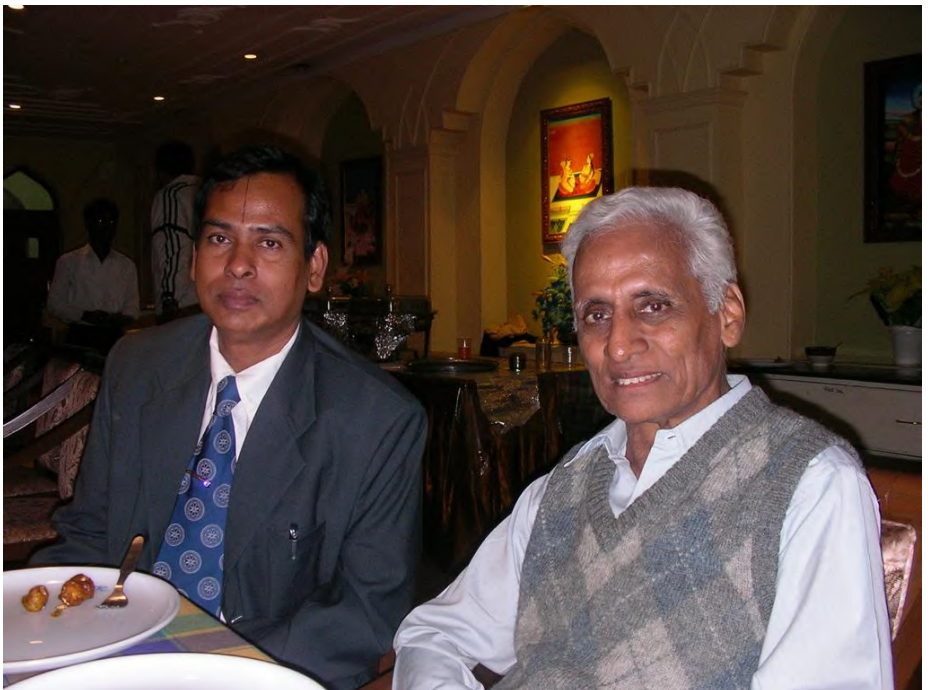

I don't mind guiding students such as the one you organized last year but does not seek any glory.

Congratulations to Prof.Dr. E.G.Rajan.

Prof.Dr. E.G. Rajan, T No: 22059, Founder & President of Pentagram Research Foundation Pvt Ltd., Hyderabad has shared his moments with his Guru, Prof. Dr. R. Sethuraman from whom he learnt the meaning of Radiation Belts and Magnetosphere in MIT.

His Guru and Dr.U.R. Rao, Former Chairman, Dept of Space were good friends. His son Prof. Dr. Panchanathan Sethuraman (Panch) is present Director of NSC, USA

News Makers of the month.....MIT Alumni Awarded the “Distinguished alumnus” award in the Dept of Instrumentation..Congratulations to all of them...

**DEPARTMENT OF INSTRUMENTATION ENGINEERING
MIT CAMPUS, ANNA UNIVERSITY, CHROMEPET, CHENNAI – 44.**

**Dr. N. PAPPA
PROFESSOR & HEAD**

Date: 4.3.2021

To
Mr. Selvakumar
Managing Director
M/s. Selva LLC, USA

Distinguished Mr. Selvakumar,

Greetings from the Dept. of Instrumentation Engineering, MIT, Anna University!

We are extremely happy to present to you the distinguished alumnus award (under the UG category) for the year 2021. In this connection, you are cordially invited for the award cum felicitation function arranged as per the following details:

Venue: KVN Seminar Hall, Dept. of Instrumentation Engineering, MIT Campus, Anna University
Date: 6.3.2021 (Saturday)
Time: 4.00 PM

The agenda for the programme is as follows:

- Invocation
- Lighting of Kuthuvilakku
- Welcome address: Dr. N. Pappa, Professor & Head, IE
- Felicitations Dr. T. Thyagarajan, Professor, IE & Dean – MIT campus, AU
- Felicitations Dr. J. Prakash, Former HOD, IE & Director – Recruitment Cell, AU
- Introduction of the Distinguished alumni awardees
- Award distribution to the Distinguished Alumni
 - UG category
 - Mr. Selvakumar, MD, M/s. Selva LLC, USA
 - Mr. Karthikeyan Nagarajan, Associate Director (R&D), M/s CTS, Chennai
 - Mr. Rajesh Vedhamurthy, MD, M/s. Arwizon Digital Pvt. Ltd., Bangalore
 - PG category
 - Dr. K. Srinivasan, Associate Professor, NIT – Trichy.
- Acceptance speech by the awardees
- Distribution of alumni scholarship to students
- Appreciation awards for innovative projects and its mentors
- Vote of thanks
- National Anthem

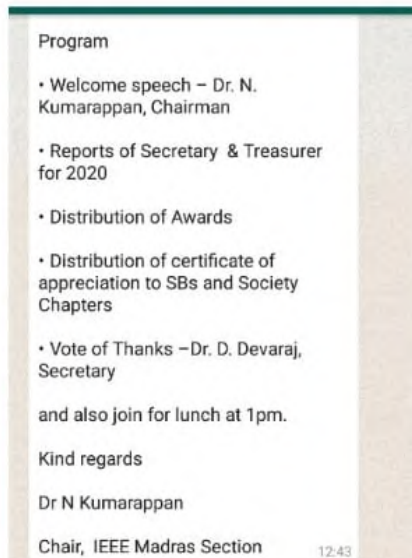

We kindly request you to grace the occasion with your honourable presence. The online link for the above programme is given below:

<https://zoom.us/j/97132240710?pwd=V3Y3MWNrdk1pVWVs2bHI2am5lK0xKdz09>

Kindly share it with your friends and well-wishers for joining the function through virtual mode.

With regards,

News Makers of the month.....MIT Dean Prof.Dr. Thyagarajan is being awarded the Life Time Achievement Award by IEEE

MITians Studying in Abroad...

By Mr. Thayanithi Ayyachi, 2011– 2015 batch of MITian (25 th batch of RPTian), Currently in KTH Royal Institute of Technology, Sweden pursuing his MS

I am Thayanithi Ayyachi and I have completed my bachelor's degree in Rubber in Plastics Technology (August 2011 – May 2015) from MIT Campus of Anna University. I am currently pursuing a Master's degree in Macromolecular Materials at KTH Royal Institute of Technology (August 2019- June 2021).

Just like for many others, MIT opened my eyes and showed me the whole world of opportunities. Thanks to the strong care of faculty towards students (especially in the Department of Rubber and Plastics Technology), di-

rect and indirect guidance from alumni, the curriculum, and the peer-group, the extra-curricular and co-curricular activities, all of which contributed in opening up a new world to me, who hailed from a very modest background. Thanks to the FFE Scholarship which introduced me to exceptional mentors, who have great roles in molding me into what I am.

By the end of my bachelor's degree, I decided to support my family financially and appeared for on-campus placements. In July 2015, I began my professional career as a Graduate Engineer (R&D) in Harita Fehrer Limited, Hosur (a sister concern of TVS Motors Limited) where I was a part of the new Product Development team and developed various trim parts and processes, and performed failure analysis, DOE studies, polymer testing, etc. Later, in September 2016, I moved to **Indian Oil Corporation Limited, India's topmost Fortune 500 Company**, through the GATE 2016 exam (and also cleared group discussion/group task/personal interview round). There, I was working with various domains in the marketing of polymers in Gujarat (PP, LLDPE, HDPE), initially with zonal coordination, followed by technical services, and finally in sales in Tamilnadu.

Among other benefits that I obtained because of my industrial experience, it made me realize the challenges of developing medical products and their importance in patients' life. This made me choose the Master's programme in Macromolecular Materials at KTH Royal Institute of Technology (Sweden), which has courses related to chemistry as well as biomedical materials, besides the state-of-the-art research in biomaterials. Studying a master's in Macromolecular Materials at KTH further deepens my knowledge of different polymers such as biopolymers, fibres, degradable polymers, etc. KTH provides extraordinary facilities for my study and the opportunity to interact with students and professors from diverse academic/professional and cultural backgrounds. Moreover, I get a good laboratory experience by working in the research group of Prof. Anna Finne Wistrand.

MITians Studying Abroad.... Contd...

I cannot express my gratitude in words to the KTH Scholarship which covers the tuition fees of my entire master's studies, without which I wouldn't have decided to study. Besides, I wish to express my sincere thanks to the **Tata Trust** and allied trusts for providing me with **J N Tata Fellowship** that covers my accommodation expenses and travel/visa charges. I wish to thank my parents and family members, friends, well-wishers, and mentors who continue to extend their support in achieving my goals.

Indeed, it was a tough decision to leave a highly paid, secure, coveted job in Indian Oil Corporation Limited. However, the experience of my study and research at KTH and living in Stockholm never allows me to ponder on that decision. As I always believe, the best is yet to come. I wish to be an academic researcher in the future and my next goal is to obtain a PhD position.

(Acknowledgement: I wish to thank Dr. K. Elamvazhuthi, the founder of 'MIT Entrepreneurs Forum' and the magazine, and RPT alumni, who encouraged me to write this article)

Opportunities for Budding Entrepreneurs..

Call for Application under Meity Tide 2.0

LAST DATE TO APPLY
15th March 2021

**Maximum Timeline:
12 Months**

Apply now @ <https://www.veltechbi.com/meity.php>

Other emerging areas (flexibility to support tech startups to address societal challenges in ICT areas)

Entrepreneur-in-Residence (EiR) to the tune of Rs. 4 Lakh per start up for Validation and development of their Idea to have a Proof-of-concept (PoC).

Grants to the tune of Rs. 7 Lakh per start-up nascent start-ups having a definite proof of concept which are to be further developed into Minimum Viable Products (MVP).
